The programme Health Coordinator

My heart is aglow with hope toward what I have accomplished since last after attended the Health programme.

A good number of Activities have be put in place ~~at~~ of it During November I did a number of clinic visit and home visit, and I was asked by the clinic officer to attend a workshop at North-western water and sewerage company on water and handpump instruction for 2 week in December.

In Jan - Feb - March I was Voted on a committee for the Village Resource Management project, as such we have been busy teaching the community about forest Resources.

From 9-13 June I have attended another workshop at the boma for NGO Women for Change. on Development, Democracy and human Rights.

This has sustained a rising pace of Activity that are appreciably.

Thus the prospects for the Health plan are impelling, progress has been made, as I thank the Health programme for the institutional capacity to administer development programmes to gain strength.

But intensive as has been the demand upon friends to take part in health programme.

III - equipped to interpret the social  
Commotion at play throughout the planet.  
I feel compelled to mention to you  
that a state of mind cannot but prompt  
us all to action, unabating action.

This mark in deeds that will  
ensure for your celestial blessings, a future  
beyond any earthly reckoning.

Saulzhi Toy,
